CVEPS - a compressed video editing and parsing system Jianhao Meng, Shih-Fu Chang

February 1997 Proceedings of the fourth ACM international conference on Multimedia

**Publisher: ACM Press** 

Full text available: 📆 pdf(1.38 MB)

Additional Information: full citation, references, citings, index terms

Igor Guskov, Andrei Khodakovsky August 2004 **Proceedings of the 2004 ACM SIGGRAPH/Eurographics symposium on Computer animation** Motion editing and compression: Wavelet compression of parametrically coherent mesh sequences

Publisher: ACM Press

Full text available: The pot(2.36 MB)

Additional Information: full citation, abstract, references, index terms

We introduce an efficient compression method for animated sequences of irregular meshes of the same connectivity. progressive mesh hierarchy, and progressively encode the resulting wavelet details. For temporally coherent mesh Our approach is to transform the original input meshes with an anisotropic wavelet transform running on top of a sequences we get additional improvement by encoding the differences of the wavelet coefficients. The resulting compression scheme is scalable, efficient, and ...

An FPGA-based video compressor for H.263 compatible bit streams

G. Lienhart, R. Männer, K. H. Noffz, R. Lay February 2001 **Proceedings of the 2001 ACM/SIGDA ninth international symposium on Field programmable gate** arrays

Publisher: ACM Press

Full text available: Ddf(218.31 KB)

Additional Information: full citation, abstract, references, index terms

This paper presents an FPGA architecture for video encoding according to the H.263 standard for video

card2 with on-board SRAM plus external SRAM. The most complex part of the H.263 protocol, a base-line encoder, was teleconferencing systems. The implementation is based on an off-the-shelf FPGA1 and is embedded in a PCI plug-in implemented. The strategies, which have been applied to build the complex encoding operations, are treated in this paper. The complete application is able to operat ...

# Robust compression and transmission of MPEG-4 video S

October 1999 Proceedings of the seventh ACM international conference on Multimedia (Part 1) Steven Gringeri, Roman Egorov, Khaled Shuaib, Arianne Lewis, Bert Basch

Publisher: ACM Press

Full text available: 📆 pdf(1.46 MB)

Additional Information: full citation, abstract, references, citings, index terms

This paper discusses issues related to the delivery of MPEG-4 video over the Internet and wireless channels. MPEG-4's network decoder are discussed, and the decoder's video quality is measured for various channel error conditions. The reversible VLCs, and forced intra-frame refresh are described. Methods for using these techniques to build a "smart" built-in error resilience capabilities such as flexible re-synchronization markers, data partitioning, header protection,

Keywords: MPEG-4, error mitigation, error resilience, robust video

Session 1B: System-level exploration and design: System level design with spade: an M-JPEG case study Paul Lieverse, Todor Stefanov, Pieter van der Wolf, Ed Deprettere ဖ

November 2001 Proceedings of the 2001 IEEE/ACM international conference on Computer-aided design

Publisher: IEEE Press

Full text available: Todf(190.70 KB)

Additional Information: full citation, abstract, references, citings, index terms

In this paper we present and evaluate the Spade (System level Performance Analysis and Design space Exploration) heterogeneous signal processing systems. In this case study we start from an M-JPEG application and use Spade to evaluate alternative multi-processor architectures for implementing this application. Spade follows the Y-chart methodology through an illustrative case study. Spade is a method and tool for architecture exploration of paradigm for system ...
